

# Database Connectivity DAO Pattern

## DAO Pattern

1 Model / Data Objects

2 DAO Interface

City.java → getters / setters  
Country.java

POJOs

"Plain old Java object"

typically 1 class per  
"real" table

getCityById.  
save (City)  
update (City)

data access  
methods

"Design Pattern"

JDBC DAO

3

implement with  
Postgres, etc

All SQL "stuff" lives  
here
